Spend & Volume Trends

Total Ad Spend

\$35,542,862.43

Total Impressions

3,479,911,254

Total Clicks

4,863,336

Total campaign spend reached \$35.5M across 3.4B impressions and 4.8M clicks in 2023. Video dominated format spend at \$15.3M while CTV, native, and display accounted for the remainder.

Monthly Ad Spend Trend (Jan to Dec 2023)

Spend accelerated consistently from January through year end, with Q4 driving the strongest growth. November peaked at \$4.6M, a 188% increase from January's \$1.6M, reflecting typical seasonal advertiser demand patterns where budgets front-load into the holiday period.

Total Spend by Format

Video commanded the largest share of total spend at 43%, followed by CTV at 28%. Despite lower spend, native and display delivered competitive conversion efficiency, suggesting opportunities to reallocate budget toward higher-converting formats.

Format Performance

CPM by Format

CTV carries the highest CPM at \$25.83, nearly 6x the cost of display, reflecting premium inventory scarcity and stronger audience targeting capabilities. Video follows at \$14.73 while native and display offer the most cost-efficient entry points at \$5 and \$4.54 respectively.

Conversion Rate by Format

Native delivers the strongest conversion rate at 26.32% despite ranking third in total spend, signaling strong audience intent alignment. Display follows at 20.12%. CTV's low conversion rate of 11.23% is expected given its brand awareness positioning rather than direct response objectives.

Format Performance Summary

	Format	Spend ▾	CPM	CTR (%)	Conversion Rate (%)	Conversion
1.	video	\$15,268,204.91	14.73	8.29%	16.17%	5,758
2.	ctv	\$9,987,368.5	25.83	4.03%	11.23%	901
3.	native	\$5,385,199.84	5	21.77%	26.32%	14,972
4.	display	\$4,902,089.18	4.54	12.64%	20.12%	8,652

Native's combination of low CPM and high conversion rate makes it the most cost-efficient format for performance-focused campaigns. CTV remains the premium choice for reach and brand visibility where conversion is a secondary objective.

Category Insights

Spend by Advertiser Category

Business and News categories lead total spend at \$3.85M and \$3.59M respectively, reflecting strong advertiser investment in high-reach professional and current affairs audiences. Technology & Computing trails at \$2.21M despite its typically high digital engagement, suggesting potential underinvestment relative to audience size. Shopping drives the lowest cost per conversion across all twelve categories, making it the strongest performer for direct response campaigns. Travel and Automotive follow with competitive conversion efficiency despite moderate spend levels.

Device & Viewability

Desktop delivers the highest viewability at 68%, supported by larger screen sizes and more stable browsing environments. Mobile devices cluster around 60% viewability, lower but still within acceptable industry benchmarks. Tablet performance mirrors mobile despite its larger format, suggesting similar browsing behavior patterns.

Desktop commands the highest CPM at \$13, a 60% premium over mobile, reflecting advertiser preference for higher viewability environments. Mobile devices offer a cost-efficient alternative at approximately \$8 CPM where reach volume is prioritized over premium placement.

Advanced Analysis

Video consistently led monthly spend across all twelve months, peaking at approximately \$2.5M in November. All four formats show Q4 acceleration, confirming that seasonal demand patterns affect the entire programmatic ecosystem regardless of format type. The spend gap between video and the remaining three formats widened progressively through Q3 and Q4, suggesting increasing advertiser confidence in video inventory as the year progressed

Top Converting Categories by Format

	format	advertiser_category	conversions ▾	conversion_rate
1.	native	Shopping	3,773	1.14%
2.	display	Shopping	2,311	0.9%
3.	video	Shopping	1,848	0.78%
4.	native	Hobbies & Interests	1,639	0.24%
5.	native	Automotive	1,570	0.27%
6.	native	Food & Drink	1,483	0.31%
7.	native	Travel	1,273	0.31%
8.	display	Travel	1,171	0.27%
9.	native	Technology & Computing	1,090	0.21%
10.	display	Automotive	976	0.23%
11.	native	Real Estate	932	0.15%
12.	native	Education	799	0.13%
13.	video	Automotive	695	0.19%
14.	native	Business	687	0.13%
15.	native	Health & Fitness	682	0.14%
16.	native	News	620	0.04%
17.	display	Food & Drink	599	0.2%
18.	display	Real Estate	548	0.11%
19.	display	Technology & Computing	546	0.16%
20.	display	Business	517	0.09%
21.	display	Hobbies & Interests	514	0.15%
22.	display	Arts & Entertainment	408	0.05%

Shopping ranks first in conversion efficiency across both CTV and display formats, making it the most consistently high-performing advertiser category for direct response campaigns. Native format amplifies this effect, its top five categories all outperform the equivalent CTV rankings, confirming native's superior conversion alignment regardless of advertiser vertical.
